Dear Sir,

RE: AKUORO RESTORE HOPE INITIATIVE - UGANDA (RHOI-UGANDA).

Reference is made to yours dated 12th, March 2021 letter to RHOI-Uganda seeking for authentic documentation on the above subject matter

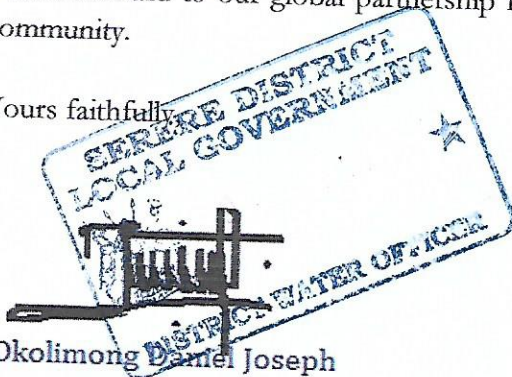

My office vividly recognizes Akuoro Restore Hope Initiative-Uganda, (RHOI-Uganda) as a legally registered Community Based Organization with legal **Reg No. SN/306/2020** since July 1st 2020 in Serere District Local Government Authorities and also aware that KTCT is a prime funder for the **“Reliable water, Healthy lives” Project** at Omagoro Community in Serere District

.However, being the sector expert and highly knowledgeable of the geological challenges in the areas as water stressed by potential, it is hereafter inevitable that; additional funding exception may have adjusted upon the grant guidelines to accommodate a high potential area at the proximity not exceeding 1,000m to be identified geologically, powered with solar photo modules, with its electro mechanicals protected by guard house, and transmitted to 20m³ reservoirs (10m³ tanks @)) for distribution consumption at the health facility and surrounding community.

This partnership for development and local building is profound and gladly appreciated by local government authorities and government of Uganda at large

I look forward to our global partnership for enhanced health service delivery to the disadvantaged community.

Yours faithfully

Okolimong Daniel Joseph

District Water Engineer - Serere.
