Introduction

- **Introduction and Location:** Uganda Sustainable Agricultural Support Organisation (USASO) registered by the NGO Board in Uganda under no.9102, formed by a team of patric Ugandans, men and women of the same vision of providing a positive development in the promotion of sustainable Agriculture for improved livelihoods in Uganda.
- The organization's main offices are located at Kitende Entebbe Road, Wakiso District. It was founded in 2009 as a Youth Community Based Organization and became a full NGO in 2012 covering the entire Central region of Uganda.

Overall Objective

- To promote sustainable agriculture, while engaging the community to a new approach of eradicating, hunger and poverty for improved livelihoods through Farmers co-operative scheme and environment conservation.

USASO's Mission Statement

- USASO is committed to promote sustainable Agriculture initiatives particularly amongst the poor small scale farmers in Central region and others through participatory and innovative practices.

Vision:

- USASO envisions a just self reliant community of men and women who are social-economic and environmentally conscious and sustainable

Core Values

- In order to serve the community better, USASO is guided by the following core values; **Hard work, Integrity, Team work, Learning Growth and Sustainability.**

Long Term Goal:

- Build the communities capacity to secure their own food, nutrition and income at household level to alleviate poverty.
- USASO mainly focuses on sustainable improvement of livelihoods of small scale farmers through sustainable agriculture and in particular organic farming, a system of farming using locally available materials to improve the soil, yield and farmers standards of living.

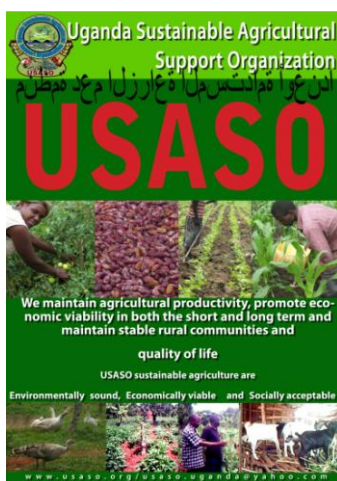

The objectives are as outlined below:

- To carry out sensitization on Sustainable Agriculture and Agro Business.
- To provide training (advisory services) in agriculture and Agro Business
- To process, package and market the products, in order to generate income through Sustainable Agriculture.
- To supply plant nutrients, and to control insects, weeds, and other pest to the Farmers.
- To provide Employment and eradicate Poverty
- To grow various Food and Cash crops in the communities as demonstration farms.
- To keep animal husbandry and poultry to eradicate Poverty.
- To provide crops/tree seedling needs of farmers.
- To identify sites for demonstration plots and nurseries.
- To form partnerships with local government, NGOs/CBOs, local communities and the private sector.
- To Protect and Conserve the Environment.
- To train interested farmers groups on organic farming techniques and practices in order to reclaim the ecological status of the project area and achieve sustainability in food production.
- To monitor and follow up trained farmers to ensure compliance with the learnt organic farming techniques and practices.
- To assist farmers acquire managerial skills
