hard work can fight poverty)***

“MBEERE land IS LIKE ISRAEL”

TUUNGANE-TUUE UKAMBILA- TUFANYE KAZI-TUFUKUZE UMASIKINI

- **When I see how much we have suffered over the last 5 decades, after having lived my life in the 3 decades of the history, I now feel that I am able to take up the challenge in Mbeere South and together we define who we are as a people. I invite you to read and understand my Manifesto as outlined on these Pages and presentation. I am convinced that if you engage me with your vote and agree to go by my manifesto I am sincere that we shall forever change the trend we are now in at the moment. Kindly, as you do this, do not at any time equate me with the past or current leadership. I am totally a different entity.**
- **If you would like to know How I have engaged the community in development agenda even now that am not elected a member of Parliament , I would ask you to seek information from -EQUITY BANK EMBU, OFFICE OF THE DEPUTY GOVERNOR OF EMBU, MINISTRY OF YOUTH AND SPORTS ,EMBU YOUTH EMPOWERMENT FORUM AND the Senior Chief's for Karambari Location and Karaba Location where I am running Greening project for the youth and Hotculture respectively. I promise to lead YOU INTO THE DESIRED FUTURE...!**

THE DETAILED VISION FOR MBEERE SOUTH PEOPLE

- I want to lead the Change you all need and Truly this shall bring glory and honor to God. I am committed towards Implementation of high Technological Trade Centers to all our Wards in this region and there shall be processing, Packaging , and Marketing of our farm produce directly to the market. Agriculture remains the backbone of our economy and we cannot overlook it. My leadership will ensure that we have enough water reservoirs which we shall stage at all high places to flow by gravitation force to reach all our residents at our homes. This will be a Community Partnership Project direct from the Partner Investors and shall have no interference with the Government Ministry of Water and Sanitation. The project which shall be allocated enough funding by our Overseas partners , shall collaborate with the County Government in a mutual relationship as partner in development. I am focused in making it a reality to have a clear and passable road network system to link us to the Mwea National Reserve and the Seven Forks for the purposes of growing the County's Revenue. This will create numerous job opportunities for the local residents of Mbeere South especially the youth. Cultural Artistic performance shall receive a good financial support to boost the talents of our Young people in Mbeere.
- we shall tour all Mbeere South region and establish the needs of our people as I embark on my planning for development of the region immediately I am elected. Some of the already ongoing projects like Karambari Greening Project and Karaba Youth Hotculture activities are already in the pipeline and funds may be released anytime from January 2015. These two pilot projects I started with my own funds through GMA, EMBU-KENYA INITIATIVE and I will run them through their processes until they shall be self sustained. Out of them, our youth will invest on personal development projects at their homes. On Education, I am planning to integrate the formal educational Curriculum with a Practical participatory Evaluation Process (PEP) an American process that shall help our teachers and children engage on evaluating personal development of each child in the basic educational levels and in the secondary education. This will be a program which I will collaborate with the Directorate of Education in our County Government. Children who shall be poor in performance shall be put to a program of evaluation that will be focused towards improving their IQ and this will entail feeding on proper diet at schools. The Government may participate in this program because the partners will be the public schools. On health, although the Government shall provide all the necessary equipment and services required at all our government facilities, We shall welcome other players who would partner with our institutions for free medical check ups and treatment from time to time.

CONT. DETAILED VISION

- This will be an act of Christian sharing of gifts of Love and Grace to the needy people in the less developed countries. My leadership will also be interested with supporting the youth for Sports. I am inviting some friends who will sit down with us in Mbeere South and discuss with us as youth how can we have exchange programs to other countries for games and sports. This will require the Ministry for Youth and Sports in the County Government to sign our Agreement with some prospective partners for this vision to be achieved. On this, I will make sure that every youth in Games and Sports who is over 18 -35 has acquired a valid Passport because it shall save time and money when the exchange program agreement shall be endorsed. The Ministry of Youth and Sports in our County and the CDF Committee will facilitate the because I will make sure that the Proposal is submitted for consideration in good time. This demands that our Play grounds in our region shall need upgrading and good maintenance. Our Constituency shall also need a consolidated effort to raise funds in purchase of a modern Bus for the transportation of our youth during Constituency, County and National Sports activities. You will agree with me that over the last two or three terms, our roads have not been a priority. We shall push for our Governments both the National and the County to release funds for these road projects. However, I have a potential mind to appeal for special support program for the youth.
- This will be a program to be funded by the CDF and the friends of Mbeere South to enable us improve the conditions of our feeder roads especially those linking to our interior -rural farms. These are very important roads which help our farmers to bring their produce to the main roads. Besides, they shall save life of the sick persons because of the easy accessibility. We have hills and Rivers which we must utilize for economic activities. The planning would be done by the committees which we shall participate in electing so that they can make proposal to donors for facilitation of infrastructure which would raise the County Revenue and create direct job opportunities to our residents. Finally, our communities need to grow in Social interactions and politics. My leadership would wish to see people who live harmoniously with their neighbors. We shall encourage peace talks and forums where we can chat our problems as a people. This will enable us to be closer to each other. Politics are changing their garment each day. I would like to engage our youth and children in political debates which would open them up for leadership challenge in our nation today. These forums will be funded programs under Special Ministry and shall be facilitated by my office and the County Government authorities. Friends, I have a big dream and a Vision which cannot be contained on this space. I am soon putting it on Video record so that it can be played by all our media houses because I have the right to do so. I urge you to refrain from all ethnic underground fights and avoid insulting leaders irrespective of their mistakes or blindness in their leadership styles. I am aware that our people are bitter because they have not received better services from our leaders who we all elected in a fair and free election on March 4, 2013. Let us handle them with respect and obey them as our leaders at this time when they are in office. May the Almighty God bless and Keep your vote save as well as your health because you are the change we need.

Horticulture is a potential Agra-business practice in Mbeere South. There is need to establish a permanent solution for water scarcity in the region because this will transform the economic life of the local communities. We have rivers Tana Apro.11KM away and Thiba Apro.7KM away which are permanent rivers in this region. Heavy and powerful machines are highly needed to pump water up the land for irrigation scheme. Our people are poor not because they cannot work but because they are not empowered to work for economic sustainability projects.

Daniel (Our Social Worker in light blue) , and myself (on white cap) visits our youth member in her small vegetable farm at Wamikuyu Springs,Karaba in August 2013.

A member of Global Youth Uwezo Initiative (Karaba) in his farm at Wamikuyu springs , Mbeere South

Ndinda's crops in Karaba black-soils turns yellow and the starts drying up because they lack adequate rainfall. This problem can be solved by embarking on water Irrigation scheme with water being pumped from Tana and Thiba Rivers up the land. Ground water can also be harvested using the modern technology . Many villagers would engage in commercial farming ●

TUUNGANE-TUUE UKABILA-TUFANYE KAZI-TUONDOE UMASKINI-4T

Meeting the Economic needs of our youth is the foundation of the future of Mbeere South

Our Global Uwezo Youth Memembers at Karambari in a participatory training process ready to cause change by Building teams ,fighting ethnic divisive politics, engaging their minds in economic activities profitable activities to safe future generations of Mbeere(initiative for Greening project to safe Thura basin Mbeere)

THE POLITICAL CONCEPT AND ARGUMENT LEADING TO CHANGE OF PARADIGM

- **Let me make it known that we the young politicians now coming up Mbeere South, Embu and Kenya are not marionettes or puppets. We are refusing to be manipulated by the authors of divisive politics that we have seen practiced over the time in our political history. With the 2007/8 Kenya post Election violence and now the wrangled we have seen in Embu! Martin Luther King Junior, is going to be a re-incarnated figure in Embu. At least, let me say clearly,. "That we the young people shall never rest until we have reformed the styles of Governance and leadership we now see repeated from our past history. Over 50 decades now, we expected Embu as a whole to be a "NEW YORK CITY" because we had our leaders sit at the Legcco. After the independence of our nation, all those whose history resembles this one of us, have gone many miles away towards realization of a new heaven on their lands. What have we ourselves reaped from our history? "POVERTY, ILLITERACY, ETHNIC DIVIDES, NEPOTISM. DEATHS, IRRESPONSIBLE LEADERSHIP, POOR INFRASTRUCTURES AND ROADS, CRIME, LAND GRABBING AND INJUSTICES OF JUDICIAL SYSTEMS" Who will save us from all these injustices? Who will stand in the gap to cause change? He will be the enemy of them all! It is me! it is you! it is us!**

There is need to share the love of God with the youth when you have something in fellowship –breaking of the bread at Karambari makes these young ones see “the Christ who changes water into wine!” 4T FORMULA...

Our Schools need some reform of educational curriculum. Many students do not fail in life because they were fools. The curriculum need to integrate the practical and technical skills with science and art. This will allow our children develop their logic towards their specializations based on interest. Most students also spend all time on roads because they are asked to go home for schools fees. Not all return to school because they come from poor families which cannot support their education. We need special kit to substitute the CDF government bursaries and the Latiff.

Our youth have diverse talents which need to be nurtured right from early stages of schooling age. Other than the Ministry of Education Kit, we need to set assign a special fund to empower the students in primary and secondary schools in their artistic talent performance as away to bridge them to the County's Talent academy. This is merely because most of these talents get lost in early stages in school if they are not activated through a program. These students from DEB Kithegi Sec Sch in Embu impressed me when I was invited to be a guest of honor at their school on June 7, 2013. They have the talent but they lack the costumes, the play backgrounds, and a theatre hall! There can be a scheme to construct theatre halls and equip them for talent nurturing and performances across our constituency. This will be a creativity center where the community can be entertained and be educated on social issues.

When Leaders sit together and agree to embrace change and different gifting, there is change in the society. Where leaders engage in ethnic divides and hatred , the society stagnates in development agenda. Different professionals when they agree to integrate their knowledge and skills, the society grows in a multi-faceted dimension. We need leadership training programs to empower the young up-coming leaders in our youth so that they can be prepared to embrace unity ,justice ,peace and hard work to build the society. Special funds can be set aside to facilitate workshops and seminars of this nature for the growth and development of the society. When they are fully empowered with these skills, they would manage the available resources in accountability and transparency manner. Corruption and impunity will slowly be wiped off the brains. When our society is given the right leadership it deserves, there can be great improvement of livelihoods because the people obey their leaders . June 7 , 2013 at DEB KITHEGI SEC SCHOOL EMBU was a day to when I highly encouraged the Society in Embu to embrace change of paradigm in doing things differently if quality results will be expected. I asked the ministry of Education to consider reviewing the Kenyan Curricular of education to embrace technical and practical skills in teaching which was scrubbed from the primary schools syllabus.

Religious leaders play a great role in bridging the society to the creator being. The secular leadership and governance of the people is incomplete without the supremacy of the Creator God. Different religious groups bring people together and they participate in peace building, advocacy and spiritual development of the person. It is important for the secular leadership to direct their people to religious leaders who perform special rites to address the needs the politics cannot meet. However, we must warn our society from harmful religious practices especially those which encourage practice of illegal actions which interfere with human right to life and protection. It has also been noted that some religious sects do not give priority to health care and education of children a thing which may not be encouraged under the constitution and laws of Kenya.

Leaders must accept to stoop low to meet the all members of the society. All members of the society have equal right to access to leadership at all times. Children are integral part of the society and require a special attention. They have opinions and grievances on what they think leadership mean to them. They may speak their mind through expressions of joy and confidence..

TOGETHER WE CAN!

4T CAN TRANSFORM THIS TO A PERMANENT WATER RESERVOIR – YOUTH IN KARAMBARI THROUGH MY LEADERSHIP NOW WANT TO RECLAIM THURA BASIN FOR HOTCULTURE AND DOMESTIC USE. THE PROJECT IS RUN BY GMA,EMBU.

LEADERS MUST AGREE TO SHARE VISION! Senior Chief of Karaba Stephen Nzioka Welcomes me at his Location which is my home for Youth engagement in Economic projects when I returned from Korea South for a short break on July 2013. •

Mary- the District Youth Officer for Mbeere South and Seniorr Chief Nzioka walks me through the youth projects in Karaba ,Mbeere South that are related to education. The youth need computer studies and enough relevant literature to connect them to the world. It is within my Vision as a leader that in future, this center will be linked with the world's great investors for wireless communication systems

Water in Mbeere South remains a great problem to the local communities. This borehole located at Karaba Market serves a radius of about 4 Kilometers away into the interior including the market, schools, churches and health institutions. The situation is pathetic because no piped water in most of the wards of the constituency. We lack monetary power and equipment to pump water from the two major rivers Tana (Appx..11kms away) and Thiba (Appx. 7Kms away).

Lands in Mbeere South are fertile for Agra-business activities. There are sandy, loamy and black cotton soils which are highly nutritious with zinc ,Iron ,Magnesium and other minerals. I was able to recruit 40 youth at Karaba and through EYEF training they were empowered to practice horticulture activities. Maina and Moses are active members of Global Youth Initiative at Wamikuyu springs. Our lands can yield any produce within the climatic conditions around Mount Kenya if water for irrigation is made available to the local farmers. This can boost economy of the residents and poverty can be buried many inches deep never to resurrect again!

Agra-business cannot be a practical engagement without highly investing on irrigation water scheme. Mbeere South region is the most suffering region in Embu County since residents use wells that dries up during the hot dry spell. Just to give a real life example, this woman uses this dirty well for domestic use. The well springs up from the underground water table. It is not clean water. Herself and the whole village of Wamikuyu in Mwea,Karaba uses this well for domestic use and for livestock. It is not safe for drinking or bathing. If it is in August - September when the sun is very hot, the spring dries up and the only option is to walk 7-11 kilometers to fetch water on a backbone at Tana River. If there is funding to help pump water from the river to several points elevated from the ground, the locals would receive enough water to do small scale farming and for domestic purposes. The Lower part of Mbeere South which neighbors the North is usually very dry and the same hardships are experienced.

“EVERY LONG JOURNEY STARTS WITH A SINGLE STEP FORWARD” GMA,EMBU-KENYA UNDER THE ABLE LEADERSHIP OF THE PRESIDENT AND THE FOUNDER REV.KITHEKA JOHN MUMO B.D.,M.A.,EDD AND HIS WIFE HELLEN ; BECOMES THE VISION BEARER FOR MBEERE SOUTH AND EMBU COSMOPOLITAN COMMUNITY AT CANAAN GUEST HOUSE EMBU ON MARCH 25, 2013 – LUKE 4:16-19 –ANOINTED FOR THE POOR AND THE MARGINALIZED ”
